FORENSIC FIELD SERVICES REPORT

Case Agency(s): ISP-INVESTIGATIONS D2	Agency Case No(s): D22000030	Laboratory Case No.: M2022-4870
Date(s) of Offense: 11/13/2022	Investigating Officer(s): Jeffery Talbott	Report No.: 2
Analyst: Hailey Youngling		
Case Name(s): Subject - JOHN ROGERS SHOWALTER		

Field Notes:

On December 6, 2022, Forensic Scientist (FS) Logan Mason and I responded to a request to take friction ridge exemplars from one subject at Idaho State Police, District 3, Investigations, located at 700 S. Stratford Dr., Meridian, Idaho, 83642. We arrived at approximately 1213 MST. We were met by Lt. Jack Catlin.

FS Mason and I recorded finger and palm exemplars from JOHN ROGERS SHOWALTER. We collected 3 inked fingerprint cards, 2 partial inked fingerprint cards, 4 adhesive lifts of full fingers and tips, 4 adhesive lifts of the right palm, and 5 adhesive lifts of the left palm.

All exemplars were turned over to Jack Catlin on December 6, 2022, at approximately 1332 MST.

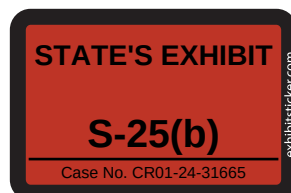

We cleared the scene at approximately 1335 MST.

REMARKS:

I declare under penalty of perjury pursuant to the law of the State of Idaho that the foregoing is true and correct.

Hailey Youngling / Forensic Scientist

Issue Date: **01/11/2023**

FORENSIC LATENT PRINT EXAMINATION REPORT

Case Agency(s): ISP-INVESTIGATIONS D2	Agency Case No(s).: D22000030	Laboratory Case No.: M2022-4870
Date(s) of Offense: 11/13/2022	Investigating Officer(s): Jeffory Talbott	Report No.: 4
Date Evidence Accepted: 12/08/2022, 12/12/2022	Analyst: Hailey Youngling	
<u>Case Name(s):</u> Subject- JOHN ROGERS SHOWALTER Subject- CONNOR CHESNUT (alias: CONNOR CHESTNUT)		

EVIDENCE DESCRIPTION:

Item 4 (Agency Exh. 220004363): eighteen finger and palm print exemplars bearing the name JOHN SHOWALTER (4.1-4.18).

Item 5 (Agency Exh. 220004405-1): one fingerprint card bearing the name CONNOR CHESNUT (5.1) and two palm print cards (5.2 and 5.3) bearing the name CONNOR CHESTNUT.

CONCLUSIONS AND INTERPRETATIONS:

Items 4 and 5 were opened and digitally preserved for comparison purposes. No latent print analysis or comparison was conducted. Digital copies of Items 4 and 5 have been forwarded for comparison, results will be issued in a separate report under the case number M2022-4843.

DISPOSITION OF EVIDENCE:

Digital images used for analysis and/or comparison are being retained by ISP Forensic Services. Items 4 and 5 will be returned to the submitting agency.

REMARKS:

The descriptions, conclusions and interpretations stated above apply to the sample(s) as received. I declare under penalty of perjury pursuant to the law of the State of Idaho that the foregoing is true and correct.

Hailey Youngling / Forensic Scientist

Issue Date: **12/20/2022**

Digital images stored in Adams Web (folders M2022-4870 and
M2022-4843)

Scanned all exemplars from Items 4 and 5. This case is the same case
as M2022-4843, just submitted under different agency case numbers.
Previous latent print assignments are under M2022-4843. In order to
utilize these exemplars, images were uploaded to Adams Web under
both M2022-4870 and M2022-4843. The purpose of this assignment is
to document and preserve the submitted exemplars for later use
under case# M2022-4843, no latent print analysis or comparison was
conducted.

CRIMINAL JUSTICE INFORMATION SERVICES DIVISION CLARKSBURG, WV 26306

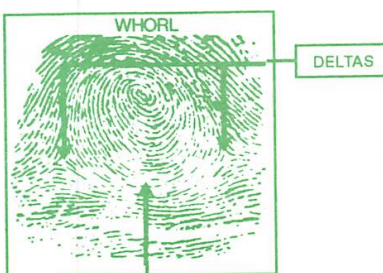

PERSONAL IDENTIFICATION

To obtain classifiable fingerprints:

1. Use printer's ink.
2. Distribute ink evenly on inking slab.
3. Wash and dry fingers thoroughly.
4. Roll fingers from nail to nail, and avoid allowing fingers to slip.
5. Be sure impressions are recorded in correct order.
6. Notate in the appropriate finger blocks if applicant is missing one or more fingers for any reason. If not missing, all ten impressions must be provided with deformities notated.
7. If some physical condition makes it impossible to obtain perfect impressions, submit the best that can be obtained.
8. Examine the completed prints to see if they can be classified, bearing in mind the following:

Most fingerprints fall into the patterns shown below. Other patterns occur infrequently and are not shown here.

Analyst: Tara Martinez		
Case Name(s): Victim - MADISON M MOGEN Victim - XANA A KERNODLE Victim - ETHAN J CHAPIN Victim - KAYLEE J GONCALVES		

Field Notes:

On 11/16/22 at approximately 1912 PST, Forensic Scientists (FS) Kerry Hogan, Hailey Youngling, Jennie Ayers, Wyatt Barie and I arrived at the Idaho State Police District 2 (ISP D2) office located at 2700 Old N S Hwy, Lewiston, Idaho 83501, to assist with a homicide investigation. Detective Talbott (ISP D2) was present upon our arrival. Detective Talbott briefed us on the scene information.

1122 King Rd.

On 11/17/22 at approximately 0854 PST, FS Hogan, Youngling, Ayers, Barie and I arrived at 1122 King Rd, Moscow, Idaho 83843. Detective Talbott was present upon our arrival. 1122 King Rd is a white colored three story home that faces north in a residential neighborhood. The house consists of 6 bedrooms and 3 bathrooms. The first floor consists of a west bedroom, a bathroom, a furnace room, an east bedroom and a stairway to the second floor. The second floor consists of a living room, a bathroom, a west bedroom, an east bedroom, a kitchen, a storage room under the stairs and a switchback staircase to the third floor. The third floor consists of a west bedroom, a landing, a bathroom and an east bedroom.

The second floor west bedroom had few belongings. A bed was against the south wall and a table with two drawers was against the north wall. A freestanding mirror and furry chair were in the northwest corner of the room. There were a number of apparent bloodstains on the bed, the south wall, the west wall, the door and the floor.

In the third floor east bedroom a bed was against the north wall and a closet was against the south wall. A desk was against the west wall. There were a number of apparent bloodstains on the bed, the north wall, the east wall, the west wall and the door.

FS Barie and Ayers took photographs of the scene using the LizQ Imaging System.

I photographed the scene for overall location, identification and condition.

FS Hogan and Detective Talbott placed markers for all of the stains that were previously labeled and collected by ISP detectives (ISP D2 markers 23-46, 48, 49, 59, and 60). An additional 21 stains were marked by ISPFS (letters B, D-F, H-X) and collected by FS Barie.

FS Hogan performed presumptive tests for the presence of blood on 61 areas from the scene, using Ortho-Tolidine.

Stairway area between the first and second floors

- north wall of stairway (ISP D2 markers 23, 24 and ISPFS markers A, B, C)
- half wall of stairway (ISP D2 markers 25, 26, ISPFS markers D, E, V, W)
- west upper wall of stairway (ISP D2 marker 27)

Second floor, leading to or part of the west bedroom

- north wall of hallway leading to west bedroom (ISP D2 marker 28)
- south wall of hallway leading to west bedroom (ISP D2 marker 38, ISPFS markers G, H, and an unmarked area)
- edge of west bedroom door (ISP D2 marker 36 and ISPFS marker I)
- exterior of west bedroom door (ISPFS marker Q)
- jamb of west bedroom door (ISPFS marker S)
- by/on light switch of west bedroom (ISP D2 marker 29)
- south wall of west bedroom (ISP D2 marker 30)
- west wall of west bedroom (ISP D2 markers 31 and 34)
- small table with one drawer in west bedroom (ISP D2 marker 32)
- floor of west bedroom (ISP D2 marker 33, 37, ISPFS marker R)
- garbage can in west bedroom (ISPFS marker T)
- furry chair in west bedroom (ISPFS marker U)
- table with two drawers in west bedroom (ISP D2 marker 35)

Second floor, bathroom

- edge of bathroom door
- white towel in bathroom

Second floor, living room

- folding table in living room (ISP D2 marker 39 and ISPFS marker F)
- right of bar cart in living room (ISP D2 marker 59)
- leg of bar cart
- white flower vase on bar cart

Second floor, kitchen

- floor under north wall of kitchen cabinets (ISP D2 marker 40)
- north kitchen wall behind sink
- kitchen cabinet
- kitchen sink
- sliding glass door

Area of switchback stairs between the second and third floors

- east wall, lower staircase (ISPFS marker J)
- west side of the half wall (ISPFS markers L and M)
- south side of the half wall (ISPFS marker K)
- the east side of the half wall (ISPFS markers N and O)

- half wall banister (ISP D2 marker 41)

Third floor

- bathroom door (ISP D2 marker 49)
- the ceiling outside of the east bedroom (ISPFS marker P)
- exterior of east bedroom door (ISP D2 marker 42)
- the interior edge of the east bedroom door (ISP D2 marker 48 and ISPFS marker X)
- the north wall of the east bedroom (ISP D2 marker 43)
- the east wall of the east bedroom (ISP D2 markers 44 and 45)
- the west wall of the closet of the east bedroom (ISP D2 marker 46)
- west wall of west bedroom (ISP D2 marker 60)

The following stains were Ortho-Tolidine negative:

Second floor

- south wall of hallway leading to west bedroom (ISP D2 marker 38)
- south wall of hallway leading to west bedroom (unmarked area)
- edge of bathroom door
- white towel in bathroom
- leg of bar cart
- white flower vase on bar cart
- floor under north wall of kitchen cabinets (ISP D2 marker 40)
- kitchen sink
- under north wall of upper kitchen cabinets
- kitchen cabinet
- sliding glass door

Third floor

- west wall of west bedroom (ISP D2 marker 60)

All other stains were Ortho-Tolidine positive, indicating the presence of blood.

The following items were collected from the scene by FS Barie and I: one potential hair from the half wall between floors one and two (marker 5), two potential hairs from the second floor hallway leading to the west bedroom (markers 1 and 2), potential hairs from the second floor west bedroom door (marker 6), one cigarette butt from the exterior of the south side of the residence (marker 3), potential face, hand and finger marks from the exterior south kitchen window (markers 7-9), and one paper note located in the parking area (marker 4).

FS Youngling powder processed the following areas: the exterior lower pane of the south kitchen window, the exterior frame around the lower pane of the south kitchen window, the area around the handle of the exterior and interior of the kitchen sliding glass door, and the frame and jamb of the interior of the kitchen sliding glass door. Six latent lift cards (latents L1 and L2) were collected from the exterior lower pane of the south kitchen window.

I photographed the approximate size and location of bloodstains and/or groups of bloodstains in the second floor west bedroom and the third floor east bedroom. In the second floor west bedroom, bloodstains AA-AG were documented. In the third floor east bedroom, bloodstains BA-BL were documented.

FS Youngling and I processed the following areas with Amido Black: upper handrail between the first and second floor, hallway leading to second floor west bedroom, second floor west bedroom floor, second floor west bedroom door knobs (interior and exterior), threshold of the second floor east bedroom, interior and exterior handle areas of the interior kitchen sliding glass door, door jamb of kitchen sliding glass door, interior threshold of the kitchen sliding glass door, edge of kitchen countertops, half wall railing between the second and third floor, and third floor east bedroom threshold and door knobs (interior and exterior). Latents L3-L6 were collected via photography, from the following: the second floor west bedroom floor (L3), the second floor east bedroom threshold (L4), the edge of the handle from the interior kitchen sliding glass door (L5), and above the handle of the exterior kitchen sliding glass door (L6).

We cleared the scene on 11/18/22 at approximately 2114 PST.

All evidence collected was turned over to Detective Talbott on 11/18/22 at approximately 2241 PST.

We transferred digital images (including LizQ Imaging System captures) to Detective Talbott on 11/19/22 at approximately 0838 PST.

On 11/19/22, at approximately 1113 PST, FS Hogan and I returned to 1122 King Rd. Moscow, Idaho 83843 to photograph potential tire impressions in the road across from the residence, as requested by Detective Talbott.

I took photographs for overall location, condition and identification. I took comparison quality photographs of the potential tire impressions.

We cleared the scene at approximately 1214 PST.

I transferred digital images to Detective Talbott at approximately 1245 PST.

2011 Toyota Prius

On 11/18/22 at approximately 1934 PST, FS Hogan and Barie arrived at 709 W Palouse Dr. Moscow, Idaho 83843 to process a vehicle. They were accompanied by Detective Tolleson (ISP D1). Detective Lehman (ISP D1) and the owner of the vehicle were also present upon their arrival.

The vehicle is a 2011 grey colored Toyota Prius, license plate Idaho 1LG1226, VIN: JTDKN3DU7B5324142. The vehicle was located in a large vehicle bay.

FS Hogan photographed the vehicle for overall location, identification and condition.

FS Hogan and Barie searched the vehicle, but there were no significant findings.

They cleared the scene at approximately 2044 PST.

We transferred digital images to Detective Talbott on 11/19/22 at approximately 0838 PST.

1127 King Rd.

On 11/18/22 at approximately 2117 PST, FS Hogan arrived at 1127 King Rd. Moscow, Idaho 83843, to assist in the search of an apartment. FS Hogan was accompanied by Detective Talbott and Sergeant Van Leuven (ISP D1).

1127 King Rd is an apartment building consisting of two stories. Apartment "1" is located on the ground level and is a multi-bedroom apartment with two bathrooms, a living room and a kitchen. There is a hallway with a kitchen to the north and a living room area to the north of the kitchen. There is at least two bedrooms east of the kitchen. There are two bathrooms south of the kitchen, on the east side of the apartment. The response was limited to the southeast bedroom.

FS Hogan performed two presumptive tests for the presence of blood on the south wall of the entry hallway (marker 1) and on the east wall of the kitchen (marker 2) using Ortho-Tolidine. Positive results, indicating the presence of blood, were obtained on both stains. Swabs were collected from markers 1 and 2 by FS Hogan.

FS Hogan cleared at approximately 2224 PST.

All collected swabs were turned over to Detective Talbott on 11/18/22 at approximately 2241 PST.

We transferred digital images to Detective Talbott on 11/19/22 at approximately 0838 PST.

DISPOSITION:

Digital images are being retained by ISP Forensic Services.

FS Youngling and I uploaded all digital images, excluding those from the LizQ Imaging System, to the digital imaging system on 11/19/22.

REMARKS:

I declare under penalty of perjury pursuant to the law of the State of Idaho that the foregoing is true and correct.

Tara Martinez / Forensic Scientist

HMY 01/03/2023:

In the scene personnel, should your scene time be more than 25 to account for the tiremark work?
Your scene time is the same as me, JA and BW but you went back to do the tire stuff.

In the general crime scene, fill in the image numbers for the first entry at 1122 King Rd. Moscow, Idaho. Also under the first entry, fill in the #of other items (10) collected in the other tests/items panel

Should the information about processing for latents/footwear with powder and amido be added to the report? And that L1-L6 were developed and preserved?

JA 02/15/23:

I added notes as requested by post its, and made notes on others. BPA pages and window lock page should be at end of house notes.

In the report, in the descriptions of the bedrooms, put details in past tense (door open, location of items).

In reference to LizQ, change to LizQ imaging system.

BPA documentation in both bedrooms not included in report. I would maybe say something like "I photographed the approximate size and location of bloodstains and/or groups of bloodstains, in two bedrooms. In the second floor west bedroom, bloodstains labeled AA-AG were documented. In the third floor east bedroom, bloodstains labeled BA-BL were documented."

LP processing (chemical and powder) is not included in report, nor are the results. I would describe both generally by location, since details are in notes.

I would only include victim names in header of report, as they were the only names we knew for sure for associated people at the time we were at the scene.

02/27/23 In powder processing paragraph, I would modify "Six latent lift cards (L1 and L2)..." to "(latents L1 and L2)". In amido black paragraph "L3-L6 were collected via photography, of the following..." I would modify to "Latents L3-L6..." and "via photography from the following:". Should "amido black" be capitalized?

0800 enroute

0838 arrived @ staging area (A&N) 0215123

0854 arrive @ scene

* Booties worn while inside scene 11/17/22

Talbot updated briefing:

Dog was on Kaylee's bed. Sliding door gets left open for dog.

Provided info on autopsy findings

One victim mentioned a flash of light - broken Scenton in the vacant room.

Broke tape seal @ sliding door @ 0915 to make entry

Numerous items in scene moved during Detective's processing. Documented as found upon our arrival.

LizQ - WB & JA

Scene Photography - TM location, condition, identification

House faces N. 3 levels, residential neighborhood, light (white?) color 0215123
1st floor - W bedroom, bathroom, furnace room, E bedroom stairway to 2nd floor2nd floor - living room, bathroom, W bedroom, E bedroom
Kitchen, storage room under stairs
switch back staircase to 3rd floor
* one step down from living room to area by E bedroom & staircase

3rd floor - W. bedroom, E bedroom, bathroom, landing 0215123

Indoor staging area created on 1st floor @ entry. Tools/supplies brought into that area. Designated trash @ that location area not involved & no evidence in area. 0215123

JA contacted Natasha Wheatley at Ada CSO regarding any footwear impressions from the scene. NW is prepared to assist us with determining brand/model and to do any comparisons in the case.

email of image from 2nd floor bedroom emailed to N. Wheatley 11/17/22 for preliminary information.

Walked through scene with Det Talbot, KH, TM

1458 left the scene

KA & ^{DET. TALBOT} ~~TM~~ placed marker #5 for all of the stains that were swabbed by ISP detectives. TM rephotographed all stains.

#47 ~~not~~ not re-marked as it was a small stain
11/17/22 that was completely collected
(floor of E bedroom)

Presumptive testing of stains done by KtH.

2nd floor - W bedroom

everything had been moved by detectives prior to our arrival. Bulk of contents had been moved out of the room, into 2nd ^{over} Bathroom ^{main} hall

In order to place ruler tape on wall, Det. Talbott assisted JA by moving the bed away from the wall. Care was taken to avoid disturbing bloodstains on floor N of bed.

Ruler tape placed by JA to document bloodstain patterns. Extended down to top of baseboard.

Initial photography by detectives checked in order to replace furniture as accurately as possible to document blood stains. Furniture items (bed, nightstand, white shelf) returned to their approximate location as found upon detectives arrival.

Trash can was later moved to under desk.

All evidence (swabs) s/s by WB. Zipped s/s
inside ~~motorist~~ bag by Ktt. To remain in scene
overnight. ^{Biology 2/17/22} _{unt}

Back door secured so door cannot be opened (sliding glass door)
Officer to be posted @ scene all night

2nd floor bedroom - blood stains

- AA: - circular stains, ranging in size from $\sim 1\text{mm}$ - $\sim 6\text{mm}$
- some distribution, especially those @ baseboard & up $\sim 12"$, seem linear
 - some distribution does not seem linear
 - overall area $\sim 16"$ up from top of baseboard and $\sim 12"$ wide
 - stain #34 present in distribution
 - located between storage shelf and mirror

- AB: primarily circular stains, ranging in size from $\sim 1\text{mm}$ - $\sim 4\text{mm}$
- at least 2 stains that are pointing down (gravity) (left of "AB" stickers, ~ 8 & 10 on scale)
 - some distribution, left of shelf w/ candles, seem linear
 - located between storage shelf and bed
 - linear area $\sim 18"$ up from baseboard (at low end)

- AC: primarily circular stains, ranging in size from less than 1mm to $\sim 3\text{mm}$; some elliptical stains; some larger stains that are irregularly shaped, with some possible smearing and/or movement; stains located above level of bed (mattress top)
- some distribution seems linear, some is not
 - located between storage shelf and bed
 - in area between top of mattress and floor, many circular stains, ranging in size from less than 1mm to $\sim 3\text{mm}$; elliptical stains also present, some pointing down (gravity), and some irregularly shaped stains
 - stain #31 present in distribution below surface of mattress top
 - stain #31 is irregularly shaped & does not contain an even distribution of blood; several long, thin stains ($.5\text{mm} \times 10\text{mm}$) ($.5\text{mm} \times 14\text{mm}$); @ lower left of stain, area where blood appears to have flowed down/left
 - stain #31 is $\sim 8-9"$ up from top of baseboard
 - on top edge of baseboard, stain that moves downward, from left to right, then flows straight down towards floor (gravity)

- AD: variety of stains - circular stains ranging in size from less than 1mm to $\sim 3\text{mm}$; elliptical stains, irregularly shaped stains, with some possible smearing and/or movement; stains located above top surface of mattress ($\sim 20"$ up from baseboard)
- 2 stains below "AD" stickers ($\sim 36-40"$ up from baseboard) are volume of blood that flowed down surface of wall (gravity)

9 OF 29

PM

2nd floor bedroom - blood stains (cont.)

AD(cont.) - 2 stains (~24" x 36" from corner of bedroom) that appear to be smears or where a bloody object brushed against the wall

- distribution of stains doesn't appear linear

AE: - circular stains ranging in size from less than 1mm to ~4mm

- elliptical stains, majority seem to be pointing down (gravity)
- numerous stains that are a volume of blood that flowed down the wall (gravity)

- just above surface of bed (top of mattress), irregularly shaped stains, appear to be smeared and/or item w/ blood touched against wall. Apparent hair ^{01/09/23} ~~included~~ included in stain area.

AF: - few small circular stains

- numerous elliptical stains, pointing down (gravity)
- irregular shaped stains, which look like a bloody object touched against the wall. Also fine lines through blood, which could have been caused by bloody hair moving against the wall
- stain #30 present
- in area below surface (top) of mattress, additional stains present, in area ~1'-12" up from top of baseboard. Volume of blood that flowed down wall (gravity).

AE/AF - large area of blood on floor below areas of AE & AF.

blood also present on bed frame and bedding. Bed's location was against wall but was moved prior to our arrival, so exact location of stains on bed in relation to stains on wall is unknown. Along baseboard, numerous small & overlapping stains, which may be from blood dripping into the pool of blood on the floor.

AG: area of stains ~12" up from top of baseboard; AG stickers are at ~17" up from top of baseboard. When bed is against the wall, stains are obscured

- volume of blood with flow; largest area @ ~13-14" high; all flow approximately straight up/down (gravity)
- some elliptical stains pointing down
- from ~6" up from top of baseboard, elliptical stains, showing movement from right to left, distribution of stains is expanding out in cone shape, getting wider on left side of distribution

PM

3rd floor bedroom - blood stains (cont.)

BF:(cont.) distribution of stains extends to underside of shelf mounted on the wall. Stains are circular, varying in size. Some distribution appears linear.

BG:- primarily circular stains, varying in size; some distribution appears linear.

- stain #44 is approximately straight up/down; volume of blood that appears to flow down wall; appears to have disturbance to stain
- numerous irregular stains that appear smeared and/or made by a bloody object contacting the surface

BH:- circular stains, varying in size, in approximate linear distribution

- elliptical stains, some orientation up & to right, some left to right, and some downward and to right
- distribution of stains extends to underside of shelf mounted on the wall. Stains are circular, varying in size. Some distribution appears linear. At least one stain appears elliptical.

BI:- varying sizes and shapes of stains

- stains at #45 are approximately straight up/down; volume of blood that appears to flow down wall; appears to have disturbance to left stain
- varying sizes of elliptical stains, some pointing up and to right, some pointing downward and to right
- above top surface of bed, and between bed and bedside table.

BJ:- primarily circular stains, varying in size; some appear to be in linear distribution

- some elliptical stains, pointing down
- stains at #46 are both circular and elliptical

BK: circular stains, varying sizes; appear to be in linear distribution

BL: small round & elliptical stains

BM: primarily circular stains, of varying sizes, on ceiling above bed; varying distribution, including some that appear linear

FORENSIC LATENT PRINT EXAMINATION REPORT

Case Agency(s): MOSCOW POLICE DEPARTMENT	Agency Case No(s).: 22-M09903	Laboratory Case No.: M2022-4843
Date(s) of Offense: 11/13/2022	Investigating Officer(s): Dustin Blaker	Report No.: 12
Date Evidence Accepted: 11/18/2022	Analyst: Hailey Youngling	
<u>Case Name(s):</u> Victim- MADISON M MOGEN Victim- XANA A KERNODLE Victim- ETHAN J CHAPIN Victim- KAYLEE J GONCALVES		

CONCLUSIONS AND INTERPRETATIONS:

Latent print L5 was previously entered and searched through the Multi-Modal Biometric Identification System's (MBIS) ten print databases maintained by the state of Idaho, the Western Identification Network (WIN), the Federal Bureau of Investigation (FBI), and the California Department of Justice, where no likely candidates were generated. Latent L5 was previously searched against the WIN Unsolved Latent Database (ULDB) where no association was made with registered latent prints from any other case. See the latent print report issued on 11/28/2022 (report no. 5) for details.

Latent L5 was searched against the Unsolved Latent File (ULF), maintained by the FBI. No association was made with registered latent prints from any other case.

Latent print L5 was forwarded to the Department of Homeland Security- Biometric Support Center (an external laboratory) for database searching, see page 3 for details.

Latent print L5 was forwarded to the Department of Defense- Defense Forensic Science Center (an external laboratory) for database searching, see page 4 for details.

Latent print L5 was forwarded to the California Department of Justice (an external laboratory) for additional database searching, see pages 5 and 6 for details.

DISPOSITION OF EVIDENCE:

L5 was previously marked and preserved. Digital images used for analysis and/or comparison are being retained by ISP Forensic Services.

REMARKS:

The descriptions, conclusions and interpretations stated above apply to the sample(s) as received.

I declare under penalty of perjury pursuant to the law of the State of Idaho that the foregoing is true and correct.

Hailey Youngling / Forensic Scientist

LATENT PRINT ANALYST

DEFINITION OF CONCLUSIONS**Identification**

An Identification is established when the latent print examiner (Latent Print Analyst (LPA) or Latent Print Supervisor (LPS) determines that there are sufficient features in agreement to conclude that two areas of friction ridge impression originated from the same source. Source refers to the area of friction skin.

Exclusion (i.e. impression was not made by)

Exclusion is the conclusion made by the latent print examiner (LPA or LPS) that there are sufficient features in disagreement to conclude that two areas of friction ridge impression did not originate from the same source. Exclusion of a subject can only be reached if all needed comparable areas are represented and legible in the known exemplars.

Inconclusive

An Inconclusive conclusion occurs when:

- a) The latent print examiner (LPA or LPS) is unable to identify or exclude due to an absence of complete and legible known prints. In such an instance, the inconclusive conclusion means that the impression needs to be re-examined using clearly and completely recorded known impressions.
- b) The latent print examiner (LPA or LPS) observes corresponding features but not sufficient to identify. Likewise dissimilar features may be observed but not sufficient to exclude. In either case, the inconclusive conclusion means that the unknown impression was neither identified nor excluded as originating from the same source.

No Value (for comparison purposes)

A No Value decision is established when the latent print examiner (LPA or LPS) determines that the area of friction ridge impression lacks sufficient clear ridge detail that no determination for identification nor exclusion is possible.

Of Value (for comparison purposes)

A latent impression is "of value" when there is enough data present to allow a meaningful comparison to known exemplars with the possibility that a conclusion can be reached.

AUTOMATED LATENT PRINT SYSTEM (ALPS) DATABASE SEARCHES

When the latent examination report states that a latent print was entered into a database, the extent of database search may be as follows:

State: State level search of the California Department of Justice Automated Latent Print System database.

Local: (Optional): Other local databases available for the California Department of Justice to search, such as the Western Identification Network (WIN), San Bernardino/Riverside County databases, etc.

FBI: National level search of the Federal Bureau of Investigation's Next Generation Identification (FBI/NGI) Automated Fingerprint Identification System (AFIS) database.

Conductive (for an automated search)

A friction ridge impression that is Conductive contains a sufficient number of ridge characteristics (minutia) within the area generally captured during feature extraction to provide a reasonable expectation of accurate search results if searched through an Automated Fingerprint Identification System (AFIS).

Non Conductive (for an automated search)

Due to a lack of sufficient minutia, friction ridge clarity or the area of the friction ridge skin recorded, it would not be reasonable to expect accurate search results from an automated search of a Not Conductive friction ridge impression. It is possible to have an impression that is identifiable but not conducive for an AFIS search.

Registration

Latent impressions that have been searched in the State, Local or FBI NGI databases and remain unidentified may be registered in the State's Unsolved Latent Database (ULDB) and/or the FBI NGI's Unsolved Latent File (ULF), which are continuously searched against new incoming records. Unsolved latent prints will be maintained in the State and FBI NGI databases until removed based on the crime type or the retention policy. If an identification occurs, a supplemental report will be generated and the latent impression will be deleted from the database(s) in which it was registered.

DEFINITION OF CONCLUSIONS

Identification

An Identification is established when the latent print examiner (Latent Print Analyst (LPA) or Latent Print Supervisor (LPS) determines that there are sufficient features in agreement to conclude that two areas of friction ridge impression originated from the same source. Source refers to the area of friction skin.

Exclusion (i.e. impression was not made by)

Exclusion is the conclusion made by the latent print examiner (LPA or LPS) that there are sufficient features in disagreement to conclude that two areas of friction ridge impression did not originate from the same source. Exclusion of a subject can only be reached if all needed comparable areas are represented and legible in the known exemplars.

Inconclusive

An Inconclusive conclusion occurs when:

- a) The latent print examiner (LPA or LPS) is unable to identify or exclude due to an absence of complete and legible known prints. In such an instance, the inconclusive conclusion means that the impression needs to be re-examined using clearly and completely recorded known impressions.
- b) The latent print examiner (LPA or LPS) observes corresponding features but not sufficient to identify. Likewise dissimilar features may be observed but not sufficient to exclude. In either case, the inconclusive conclusion means that the unknown impression was neither identified nor excluded as originating from the same source.

No Value (for comparison purposes)

A No Value decision is established when the latent print examiner (LPA or LPS) determines that the area of friction ridge impression lacks sufficient clear ridge detail that no determination for identification nor exclusion is possible.

Of Value (for comparison purposes)

A latent impression is "of value" when there is enough data present to allow a meaningful comparison to known exemplars with the possibility that a conclusion can be reached.

AUTOMATED LATENT PRINT SYSTEM (ALPS) DATABASE SEARCHES

When the latent examination report states that a latent print was entered into a database, the extent of database search may be as follows:

State: State level search of the California Department of Justice Automated Latent Print System database.

Local: (Optional): Other local databases available for the California Department of Justice to search, such as the Western Identification Network (WIN), San Bernardino/Riverside County databases, etc.

FBI: National level search of the Federal Bureau of Investigation's Next Generation Identification (FBI/NGI) Automated Fingerprint Identification System (AFIS) database.

Conductive (for an automated search)

A friction ridge impression that is Conductive contains a sufficient number of ridge characteristics (minutia) within the area generally captured during feature extraction to provide a reasonable expectation of accurate search results if searched through an Automated Fingerprint Identification System (AFIS).

Non Conductive (for an automated search)

Due to a lack of sufficient minutia, friction ridge clarity or the area of the friction ridge skin recorded, it would not be reasonable to expect accurate search results from an automated search of a Not Conductive friction ridge impression. It is possible to have an impression that is identifiable but not conducive for an AFIS search.

Registration

Latent impressions that have been searched in the State, Local or FBI NGI databases and remain unidentified may be registered in the State's Unsolved Latent Database (ULDB) and/or the FBI NGI's Unsolved Latent File (ULF), which are continuously searched against new incoming records. Unsolved latent prints will be maintained in the State and FBI NGI databases until removed based on the crime type or the retention policy. If an identification occurs, a supplemental report will be generated and the latent impression will be deleted from the database(s) in which it was registered.

FORENSIC FIELD SERVICES REPORT

Case Agency(s): MOSCOW POLICE DEPARTMENT	Agency Case No(s): 22-M09903	Laboratory Case No.: M2022-4843
Date(s) of Offense: 11/13/2022	Investigating Officer(s): Dustin Blaker	Report No.: 21
Analyst: Hailey Youngling		
Case Name(s): Suspect- BRYAN KOHBERGER Victim- MADISON M MOGEN Victim- XANA A KERNODLE Victim- ETHAN J CHAPIN Victim- KAYLEE J GONCALVES		

Field Notes:

On January 5, 2023, at approximately 1351 PST, Forensic Scientist Tara Martinez and I arrived at the Latah County Jail, located at 522 S. Adams St., Moscow, Idaho, to assist with collection of photographs, buccal swabs, friction ridge exemplars and hair samples from one subject, BRYAN KOHBERGER. We were accompanied by Gideon Roberts (Idaho State Police, District 2) and Travis Shirley (Federal Bureau of Investigation). Also present were Anne Taylor (Kootenai County Public Defender's Office) and associates, as well as Latah County Jail personnel.

FS Martinez photographed BRYAN KOHBERGER's person for overall identification and condition.

FS Martinez collected two simultaneous buccal swabs from the mouth of BRYAN KOHBERGER.

FS Martinez and I collected friction ridge exemplars of the fingers and palms of BRYAN KOHBERGER (2 inked fingerprint cards and 10 sheets of adhesive lifts).

FS Martinez collected plucked hair samples from four areas of the head and arms of BRYAN KOHBERGER (one sample each from the front of the head, back of the head, right arm, and left arm).

We cleared the Latah County Jail at approximately 1517 PST.

All collected items were turned over to Tim Smalldridge (Moscow Police Department) on January 5, 2023, at approximately 1530 PST.

Digital images were transferred to Jeffory Talbott (Idaho State Police, District 2) on January 5, 2023, at approximately 1543 PST.

We cleared Moscow Police Department at approximately 1609 PST.

FS Martinez uploaded images to the digital imaging system on January 6, 2023.

Digital images are being retained by ISP Forensic Services.

REMARKS:

I declare under penalty of perjury pursuant to the law of the State of Idaho that the foregoing is true and correct.

A handwritten signature in black ink, appearing to read "Hailey Youngling".

Analyst: Tara Martinez		
Case Name(s): Suspect - BRYAN KOHBERGER Victim - MADISON M MOGEN Victim - XANA A KERNODLE Victim - ETHAN J CHAPIN Victim - KAYLEE J GONCALVES		

1630 NE Valley Rd. #G201

Field Notes:

On 12/30/22 at approximately 0705 PST, Forensic Scientists (FS) Hailey Youngling, Jennie Ayers and I responded to 1630 NE Valley Rd, #G201, Pullman, Washington to assist in a homicide investigation. Jeffery Talbott with Idaho State Police District 2 (ISP D2) and Dustin Blaker with Moscow Police Department arrived to the residence with us. Deputy Chief Dawn Daniels with Washington State University Police Department (WSU PD) was present upon our arrival. The scene was not secured at this time. The temperature was approximately 33 degrees Fahrenheit and the weather was snowy and wet.

1630 NE Valley Rd #G201 is a beige six-plex apartment building with a maroon/brown colored "G" on the exterior. Apartment #G201 is on the second floor on the east side of the building. The second floor staircase is flush with the surrounding sidewalk and has a single flight of stairs going up. The entryway to apartment #G201 is directly east of the staircase.

The interior of apartment #G201 was well kept and sparsely furnished. There are two bedrooms, one bathroom with a separate water closet, a living room and a kitchen. The entryway door enters to the living room. The living room was furnished with a two-seat sofa on the east wall. There was a coffee table and a rug in front of the sofa. On the west wall, there was a television stand with a television and various books on the interior shelving. In the southwest corner of the living room, there was a disconnected air conditioning type unit. The south wall of the living room has a door that opens to the exterior patio. To the north of the television stand, there was a table with one lamp, powered off. On the north wall of the living room, there is a closet. East of the closet (on the north side of the apartment) are two bedrooms, one on the west side, one on the east side. The northwest bedroom was unfurnished and was locked prior to entry. There are two empty 2-door closets located on the west

wall. The door to the northeast bedroom is in the northwest corner of the room. Along the west wall there was a table that contains a computer tower and electronics. A bed was against the north wall. The east wall contains two 2-door closets. To the south of the closet, there was a stool with folded white towels, a small white trash bin and a white laundry basket. The bathroom is located to the south of the northeast bedroom. The kitchen is located to the south of the bathroom. There was a fridge in the northwest corner of the kitchen. To the east of the fridge is a sink. The stove and oven was on the east wall. There were various kitchen appliances on the counter including a dishrack, an electric can opener, a microwave, coffee makers and a bean grinder. The kitchen cabinets contained various food items, dishes, cooking utensils, pots and pans. On the south wall of the kitchen, there was a table with shelving and one stool.

I photographed the exterior and interior of the apartment for overall location, identification and condition.

FS Ayers captured images using the LizQ Imaging System.

FS Ayers performed presumptive tests for the presence of blood on 51 areas inside the apartment. Positive results, indicating the presence of blood, were obtained on two stains from the bedding of the northeast bedroom. A cutting was collected from a pillow in the northeast bedroom (marker B) and a mattress cover was collected from the bed in the northeast bedroom (marker C). A third stain (marker A) was collected from the kitchen countertop but was not tested, due to the size and condition.

Blood was not detected on twelve stains tested in the kitchen, fifteen stains tested in the northeast bedroom, seventeen stains tested in the bathroom, and five stains tested in the living room.

I collected eleven items from the apartment. I collected five items from the north wall closet: one nitrile type black colored glove (marker 1), one "Walmart" receipt with one "Dickies" tag (marker 2), two "Marshalls" receipts (marker 3), one dust canister from "Bissell PowerForce" vacuum (marker 4), eight possible hair strands from the head of the "Libman" broom (marker 5). I collected one "FireTV" stick with cord and plug from the living room television (marker 6). I collected one possible hair strand from the east wall in the bathroom (marker 8) and one possible hair strand inside the shower drain in the bathroom (marker 9). I collected three items from the northeast bedroom: one possible animal hair strand (marker 7), one possible hair strand from the computer pad in the northeast bedroom (marker 10), and one possible hair strand from a pillow in the northeast bedroom (marker 11). FS Ayers collected one computer tower in the northeast bedroom (marker 12).

We cleared the scene at approximately 1933 PST.

All evidence was turned over to Deputy Chief Daniels at approximately 2022 PST on 12/30/22.

1475 NE Glenn Terrell Mall, Wilson Short Hall, Room 12

Field Notes:

On 12/30/22 at approximately 2116 PST, Forensic Scientists (FS) Hailey Youngling, Jennie Ayers and I responded to 1475 NE Glenn Terrell Mall, Wilson Short Hall, Room 12, Pullman, Washington to assist in a

homicide investigation. Jeffery Talbott (ISP D2), Lawrence Mowery (Moscow Police Department) and Deputy Chief Daniels (WSU PD) arrived to the office with us. The scene was secured by Tim Snell, Leslie Lehman (ISP D1) and WSU PD.

Room 12 has four desks. There was also a filing cabinet and shelving.

I took photographs for overall location, identification and condition.

No items were collected or tested.

We cleared the scene at approximately 2155 PST.

I transferred digital images to Talbott (ISP D2) on 12/31/22 at approximately 0910 PST.

FS Ayers provided a thumb drive with LizQ images to Talbott (ISP D2) on 12/31/22 at approximately 1148 PST.

I uploaded all digital images, excluding those from the LizQ System, to the digital imaging system on 01/03/23.

DISPOSITION:

Digital images are being retained by ISP Forensic Services.

REMARKS:

I declare under penalty of perjury pursuant to the law of the State of Idaho that the foregoing is true and correct.

01/24/2023 HMY: for the # of presumptive tests, I think the number should be 51, since marker A wasn't tested just collected- update 52 to 51 in the report, "FS Ayers performed a presumptive test for the presence of blood on 52 areas inside the apartment"

In the report: "East of the closet are two bedrooms, one on the west side, one on the east side" Maybe add something about the bedrooms also being north, maybe "East of the closet, on the north side of the apartment, are two bedrooms, one on the west side, one on the east side"?

12/30/2022

1630 NE Valley Rd. G201 Pullman WA

Weather: ~33°F, snowy, wet, drippy

arrived @ residence approx. 0705 PST

exterior of building is beige, marked with Maroon/brown letter "G". Six-plex apartment building, apartments adjoined with another six-plex

303	304
203	204
103	104

301	302
201	202
101	102

knocked & announced @ 0712 PST

Talbot (ISPD2) and Dustin Blaker (Moscow PD) entered @ 0717 PST as well as Deputy Chief Daniels (CWSH PD)

apartment 201 is on the second floor on the east side of building. First floor ~~is~~ has a half flight staircase going down to "ground level" which is slightly below ground.

Second floor staircase is flush with surrounding side walk and has a single flight of stairs going up. entry to apartment 201 is directly east of staircase. apartment 202 is directly across from 201 ^{with} on the west side of building with a ~~single staircase~~ ^{two half} flights going up to floor 3.

Building ^F ~~A~~ is directly east of building G. North of building ~~A~~ ^F is building "E". Another ~~single story~~ ^{two story} townhome style building labeled "H" is to the west of building G. Further west of building (townhome) H is a large, multiple unit mail box structure and beyond are buildings "R" and "Q". South of building "G" is building ^F ~~J~~ directly behind building G, north of building ~~J~~ ^F is a playground area. East of building F is building "K". East of playground area is a small concrete basketball court. ^{Building "L"} ~~Building "L"~~ is directly east of building K, which is east of building J.

On the backside of building G, each apartment has a balcony. 201 balcony, looking upward from south side has two plastic folding chairs and a folding table. the ~~balcony~~ ^{balcony} window is slightly open with a white panel inserted in opening, appears to have a foil covered circular port.

PM

PM

living room closet has vacuum, broom/dust pan, several empty hangers and shelves have various papers, packaging, household items.

bathroom has a vanity with two sinks along north wall. no shower curtain or liner, one white towel hanging on east wall hanging rod. Small white trash can in toilet room - empty, no liner.

TV Stand has a set of keys on shelf and one "criminal justice" edition 4 (still in plastic) on shelf.

FILLED w/ various food items, dishes, cooking utensils, pots + pans. TM 03/17/23

Kitchen cabinets sparsely filled. cabinet on East wall, north of stove has several prescription bottles for Levothyroxine.

T. Martinez + H. Youngling searched kitchen cabinets, drawers, and appliances. J. Ayers removed light fixtures, flagged potential blood.

Talbott and T. Martinez searched TV Stand, T. Martinez photographed contents

J. Ayers and H. Youngling searched bathroom cabinets and examined for potential blood, flagged potential blood.

Talbott searched ^{west side of} closet on north wall of entry way. T. Martinez collected one black glove (1), one walmart receipt with one Dickies tag (marker 2), two marshalls receipts (marker 3),

The entryway closet is located on the north wall of the entry way and has two sides, one west, one east. Talbott searched both the west and east side of the entry way closet. T. Martinez photographed both sides for documentation. HMY 03/17/23

Talbott searched closet on north entry way wall, T. Martinez photographed contents for documentation.

J. Ayers and H. Youngling searched closet in NE bedroom, flagged potential blood. Jennie Ayers searched contents of closets and flagged laundry hamper for potential blood.

PM

PM

Talbot searched contents of trash can in NE bedroom -
Various documents and dry, cleaning type wipes

T. Martinez searched East side of entry way closet -
collecting contents of vacuum dust bin and flagged
broom and dust pan for hair and potential blood.
deflated air mattress on top shelf of closet, stuck to shelf not
unfolded. Vacuum dust container w/ contents collected (markery)
by T. Martinez.

Talbot opened radiators and examined AC hosing.
vent in bathroom is painted shut. Radiator and AC hosing in living room 03/17/23
HMY

Talbot examined vacuum roller brush, appears clean
T. Martinez photographed for documentation

NW room unprocessed and used as staging area.

@ approx 1845 PST

Talbot and J. Ayers examined and searched Storage
Unit, external to Apartment G201. Storage unit
was in building F, labeled G201. Empty w/
cobwebs visible across entry. Door made of plywood,
reddish orange stains along the left ~~edge~~ ^{hinge} edge
of the door, consistent w/ the glue between the
layers of wood. Talbot took photos for documentation.
Cleared storage @ approx 1852 PST.

T. Martinez examined outdoor back balcony.

H. Youngling examined glass/screen door and entry door.
J. Ayers tested an irregular reddish stain on the entry
way door frame interior, north side

all collected items handed over to Daniels @ 1930 PST,
unsealed for transport to WSU PD, will seal upon arrival
to that office.

Talbot took exit video ~~of~~ ^{from} of entire apartment once we
cleared the residence @ approx 1930 PST

Cleared scene, enroute to WSU PD @ 1933 PST.
